Core Front-End Expertise: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Responsive UI Development

Core Back-End Expertise: PHP, Laravel, Node.js, Express.js, Server-Side Business Logic, Request Validation, Error Handling

APIs & Databases: REST API Design, Development & Integration, Third-Party Services, MySQL, PostgreSQL, SQL, Database Operations

Additional Technologies: AngularJS, Vue.js, Python, Django, FastAPI

AI-Assisted Development: Claude, Codex, AI-Assisted Implementation, Debugging & Code Analysis

Engineering & Delivery: Git, GitHub, Pull Requests, Code Reviews, CI/CD, Unit Testing, Deployment, Production Support, SaaS Development

PROJECTS

FLOOD CONTROL WATCH

www.floodcontrol.watch

- Daily-updated public tracker of the Philippine flood control corruption scandal, compiling cases, charges, and frozen assets from official sources and established news outlets, with a source link for every item.
- Answers visitor questions in English or Taglish with sourced responses.

PROFESSIONAL EXPERIENCE

SENIOR FULL-STACK DEVELOPER | REACT.JS, TYPESCRIPT & LARAVEL

2022-Present

CoDev Philippines

- Engineer and optimize production React.js and TypeScript features for event planning, pledging, e-commerce, network services, and SaaS products, translating complex requirements into maintainable, responsive user experiences.
- Architect PHP/Laravel and Node.js back-end functionality, integrating REST APIs with validation, structured error handling, business logic, database operations, and third-party services.
- Strengthen delivery quality through Git branching, pull requests, peer code reviews, testing, CI/CD support, deployment, and production troubleshooting.
- Collaborate remotely with QA, design, back-end, product, and client teams while applying Claude and Codex to accelerate implementation, debugging, and code analysis.

FULL-STACK DEVELOPER - FRONT-END FOCUS

2020-2022

SwapooLabs, Inc.

- Engineered React.js and TypeScript interfaces for a Bitcoin wallet, cryptocurrency trading, and digital-asset staking platform.
- Integrated REST APIs and delivered selected Python back-end updates to support reliable full-stack wallet, trading, and staking workflows.
- Improved release readiness through code reviews, testing, deployment coordination, production fixes, and ongoing application maintenance.

FULL-STACK DEVELOPER | PHP/LARAVEL, REACT.JS & TYPESCRIPT

2019-2020

Commude Philippines, Inc.

- Developed full-stack applications for ride-hailing, event management, and e-commerce clients using Laravel, React.js, TypeScript, and SQL databases.
- Designed REST API endpoints and end-to-end features supporting business rules, database transactions, and front-end data requirements.
- Executed code reviews, testing, deployment, issue resolution, and maintenance across multiple client projects and business domains.

PHP/LARAVEL FULL-STACK WEB DEVELOPER

2018-2019

Digima Web Solutions

- Engineered PHP/Laravel ERP and multi-level marketing applications with responsive interfaces, SQL-backed features, and API-connected workflows.
- Diagnosed front-end, back-end, API, and database issues while supporting testing, release preparation, deployment, and production maintenance.

EDUCATION

Bachelor of Science in Information Technology

STI College of Sta. Maria

2017
